Roberto Gobetto	UniTo
Giancarlo Pelizzi	UniPr
Maurizio Peruzzini	CNR-iccom
Piero Zanello	UniSi

Plenary Lectures:

Medaglia Sacconi - Robin Perutz (York University)

The Many Roles of Sigma Complexes: Intermediates, Transition States and the Resting States for Catalytic Mechanisms

Peter Maitlis (Sheffield University)

Nano-Catalysts and the Border Between Homogeneous and Heterogeneous Catalysis: the Role of Electrophilic Organometallic Species in Fischer-Tropsch Synthesis

Chang-jun Liu (Tianjin University)

Properties of Metal Clusters Formed under the Influence of Argon Glow Discharge Plasmas

Robert J. Angelici (Iowa State University)

Organometallic Chemistry and Catalysis on Gold Metal Surfaces

Premio Nasini - A. Credi (Università di Bologna)

Transition-metal Complexes as Components of Molecular Machines and Logic Gates

Chunsang Song (Pennsylvania State University)

Design of Catalysts and Sorbents at Nano-scale in Fuel Processing for H₂ Production and Fuel Cells
